Setting your mission statement

Memory Cafe Mission Statement

The aim of (*memory cafe name*) Memory Cafe is to provide a regular, safe and welcoming meeting place for people who have been diagnosed with early dementia or who are experiencing short term memory loss. We endeavour to create opportunities to aid memory through games, activities and social interaction, whilst at the same time providing support for carers. It is our intention to ensure access to advice from health and social care professionals and help to reduce the feelings of isolation experienced by both our members and their carers.

Our organisation will be one that understands its community and speaks to it; we will be innovative in doing so and reflect our society in our presentation.
